PANSIES

Pansies have always been a great specialty with us and we are justly proud of the quality and trueness to type of our strains. Pansies succeed best in rich, well-drained soil in a sunny position, and produce their finest flowers in the cool, early days of spring. Keep flowers picked during the summer, plants pinched back, and you will get a nice lot of flowers again in the fall. For earliest blooms, seed indoors. Buy our hardy plants. 75c dozen.

Tomatoes

½ oz. to 100 ft.; 2 oz. per acre

In February or March sow seeds lightly in rows in greenhouse, hotbed, or window box, and when plants have reached a height of 3 inches, transplant in hotbeds. About June 1 set out in open ground, 3 feet apart, giving plenty of well rotted manure to each plant. Water freely during hot weather. To obtain

the best results, trellises or stakes should be used.

PETAMINE

A Complete Balanced Diet to be Fed Daily Throughout the Year.

What Petamine does for Canaries: Peps them up, increases song; adds color and sheen to feathers, and keeps them in fine, vigorous condition.

Restores lost song and feathers and cures many ailments when due to faulty diets.

Makes moulting easier and faster and plumage more brilliant and colorful.

Works wonders during breeding season, produces more fertile eggs, finer, sturdier young birds.

Petamine may be used as the exclusive diet or with mixed whole seeds. Recommended for all cage birds. 5 oz., 35c; Lb., 70c; 2 Lbs., \$1.30.

SPECIAL—Milot-Mills Birdseed Mixture

1 lb., 20c; 2 lbs., 38c. Postage extra.

NEUTRALIZER FOR OUTDOOR POOLS

It is absolutely harmless to fish, snails or vegetation and can be used when fish are spawning, as it will not injure the fish eggs or young fish.

Price, 5 lbs., 50c; 10 lbs., 95c; 25 lbs., \$2.00

Hints on Care of Goldfish

Should the fish show signs of having fungus, or become logy, a salt bath will bring them out of it; or should the fish come to the top for air it shows there are too many fish in the bowl or aquarium.

Write us for pamphlet on Care and Feeding of Fish and Baby Turtles.

How to Have a Good Lawn

Spade the ground as deep as possible and turn several times to see that it is thoroughly pulverized. Sheep guano or peat moss will add humus and improve the seed bed. Rake level and water thoroughly so the ground will settle. The seed bed should be allowed to stand for about two weeks, watering from time to time so the weed seeds will sprout.

Roll the ground before seeding, to prevent it from settling unevenly, and then rake the surface lightly. Sow the seeds so as to cover the ground thoroughly, and then cover it lightly with soil. Roll again so as to press the seed in firmly.

FLOWER SEEDS---All-American Award Winners for 1948

Including new and rare kinds and varieties which received the highest awards for the year 1948. Our stock includes special and original assortments of Bodger's, Burpee's, Vaughn's, Dreer's, and Ferry-Morse flower seeds. We also put up in our own packets many varieties which we secure direct from the originators and growers in California.
